

# Guaranteed Data Infinite Tag Life

The EPIC Kit contains everything required to evaluate, demo and build an EPIC solution. The kit consists of:

- A Native EPIC SensArray-Enterprise RFID Reader (supports EPIC Level 2 and Level 4)
- Class-4 PoE Injector
- Two Ethernet Cat6 Cables
- A Windows EPIC Decoder DLL For Use With Non-EPIC Readers
- 1 EPIC Encoded Roll of Tags (50 tags/roll)
- 1 EPIC Evaluation Key

The 4th generation SensArray-Enterprise RAIN RFID **reader** integrates an 8.5dBic **antenna**, network **switch** and **power distribution** system with **native EPIC decoding** for either **EPIC Level 2 or EPIC level 4** tag interrogation. This combination provides the capability to test both the memory and transmission resilience provided by EPIC.

Just plug one of the Ethernet cables that carries power and data into the reader and one into your network or PC, download the software from our website, and go!

| Contents   | Number |
|--|--------|
| SensArray-Enterprise - EPIC Level 2 & Level 4 Native | 1      |
| Class-4 PoE Injector                                 | 1      |
| Ethernet Cat6 Cabling (10ft)                         | 2      |
| Windows EPIC Decoder DLL                             | 1      |
| EPIC Encoded Roll of Tags (50 tags/roll)             | 1      |
| EPIC Evaluation Key                                  | 1      |

## Optional Handheld

The SensThys CS108 sled handheld (details in separate product brief) is a native EPIC level 2 handheld solution that can be paired with iOS/Apple (available shortly) or an Android (available now) device.
