

CEO Note: **SensThys Joins Composite Applications Group**

A Series of Messages from our CEO... Jo Major

What is CAG? A consortium providing composite solutions for those replacing traditional materials with composites.

Includes:

- Leading **technology providers**
- **OEM's** seeking a better solution

OEM's Include:

Why Join?

- **Accelerate** use of wireless sensors into the composite space
- **Expose** SensThys' solution to a larger audience
- **Educate** composite manufacturers to the benefits of new available technologies
- **Learn and evolve** our solution

What's The Stir?

- **Real-time process control** for composite manufacturing
- **Improve** quality and productivity
- **Reduce** epoxy waste
- **No wires, no batteries, no fuss**
- **100's of sensors** monitored by a single controller
- **Paper thin** sensors
- **Ongoing structural reporting**

***Interested in learning more about our patent-pending solutions
for composites?***
