

CEO Note: **SensThys Joins IACMI, Attends Members Meeting**

A Series of Messages from our CEO... Jo Major

What is IACMI? Institute for Advanced Composites Manufacturing Innovation, or just “IACMI—The Composites Institute”.

Improving everyday lives through the power of composites

- **Partnership** of industry, academic and governmental organizations
- **Benefits** the nation’s energy and economic security.
- Brings low-cost, energy-efficient advanced **composites to commercial readiness**

What did we bring to IACMI?

- **Unique** sensor solution that analyzes composites
- Solution incorporates a network of **low-cost of wireless sensors**
- Full 3-D **tracking of manufacturing process**, from resin arrival to final cure

Summer 2022 Members Meeting

- Convene, Connect, Catalyze
- Just completed, June 28-30, Salt Lake City
- In-person meeting, 200 industry leaders
- Oak Ridge National Laboratory (ORNL), National Renewable Energy Laboratory (NREL), The Utah Advanced Materials and Manufacturing Initiative, Dept. of Energy, Dept. of Defense, National Institute of Science and Technology...

What's So Important?

- SensThys novel approach ... we created a stir!
- Real-time visibility to the cure process
- Post manufacturing structural tracking
