

CEO Note: **SensThys – Unique Universal Antenna**

A Series of Messages from our CEO... Jo Major

Unique. Yea ... I've heard that before! So have we. It gets old doesn't it! But this is justified. It's a truly universal antenna.

What's so universal about it?

Universal **regionally**:

- One SKU for the world i.e. ETSI and FCC bands
- Does so without compromises

Universal **placement**:

- IP68, 100% sealed for use **outside** or in **harsh environments**
- Polycarb radome for **strength** vs cows or forklifts
- Low profile, **esthetic** with neutral tones for offices & hospitals

Universal installation

- Supplied for flush or through-hole mounting
- Optional **VESA** conversion kit

Also:

- **Lower profile** than industry equivalent antenna (0.8" vs >1")
- **Cleans easily: Hose it down** outside or **disinfect** it in hospitals
- Works with **any RFID Reader**

Performance & Quality?

- **Every unit** is tested
- 9dBic
- 1:1.3 VSWR **guaranteed**

Applications:

- **Tough enough:** Warehouses, dock doors, yard gates, construction, coolers/freezers, government, military, ranchers/farms.
- **Practical enough:** Schools, hospitals, offices, retail, doctors' offices, retirement communities.
