

CEO Note: **Android Leak Detection is Here**

A Series of Messages from our CEO... Jo Major

Our latest passive sensor software for our handheld reader, ProSens Mobile, is now available for download on the Google Play Store.

Handheld Reader: **Automobile (and other) Leak Testing.**

- Last month we told you about our iOS Leak Detection application
- Today we released the equivalent Android application
- Customers want to automate production-line leak detection, vehicles, pipes, HVAC etc.

- **Visual** traffic light system notifies staff of leaks
- Finds leaks easily with **Geiger search**
- Software can be customized by SensThys to customers specific needs
- Search for "ProSens" or click the badge below . . .
