

CEO Note: **Critical Infrastructure Ready**

A Series of Messages from our CEO... Jo Major

Unlike other products on the market, Core & Enterprise RAIN RFID readers were designed to address **modern security threats** including hacking, data theft, and data manipulation. Our readers have less than 1% the attack surface of other readers.

Practical Security

Proven Secure and Used in Government & Healthcare

- Completed formal **penetration testing**
- Passed with absolutely **no identified vulnerabilities**
- NIST 8259 reviewed
- **Unique** system architecture **minimizes attack surface**
- Supports **TLS 1.2**
- **Authentication**
- **Certificates**
- **Port** control
- Controllable from **RESTful**
- EPIC **data robustness** and **validation**

Why Are These Readers So Different?

- Unique hardware and software architecture
- **No** operating system
- **No open-source drivers**
- True **data validation** and **error correction**

Results

A suite of critical infrastructure readers ready for use in demanding applications where data and system resilience are required for success or are just mission critical!
