

## CEO Note: **Passive Sensing at RFID Journal Live**

A Series of Messages from our CEO... Jo Major

The annual RFID Journal Live event just concluded in Orlando, FL. SensThys exhibited the latest passive sensors in operation with the SensThys PhySens tool at several of our close partners, including IDentiv and Tageos.

## PhySens

### Battery-free and Wireless Sensor Interrogation

- **Downloadable** from SensThys website
- **Real-time** interrogation and display
- Result logging for later **analysis**
- Friendly GUI and real-time **graphing**
- Optimal **sensor accuracy**
- Interrogates multiple sensor types **concurrently**
- Runs natively on all **SensThys readers**

## Temperature, Moisture, Strain, Pressure, Index, Light . . .

- Each sensor can report two physical attributes
- Temperature and strain and temperature and moisture demonstrated
- Focus is on large-scale manufacturing: automotive, composite manufacturing, construction, and carbon fiber

---
