

CEO Note: SensThys Drives Hospital Innovation & Savings

A Series of Messages from our CEO... Jo Major

Increased Productivity and Customer Satisfaction

[Partheas](#) has implemented a solution that uses SensThys advanced RFID technology, paired with Partheas Flow, that modernizes care delivery, increases efficiency, and ultimately leads to an improved patient experience.

Partheas Flow

Challenges

- Minimize patient delays.
- Increase patient satisfaction.
- Increase hospital operational efficiencies.
- Reduce costs.

Needs

- To optimize patient flow while managing capacity.
- Easy migration from a manual to the automated system.
- Reduce staff workloads.
- A seamless transition for patients & staff.

Solution

- Patients provided reusable RFID badges that guide them through their visit.
- Enterprise Readers & SensRF-101 antenna track patients within the hospital.
- Active capacity management linked to doctors and nursing staff availability.
- On-screen notification guides patients while in the waiting area

Key Take Aways

- Optimizes resources while reducing wait times.
- Improved patient experience.
- Successful management of 1200 patients/day facility.
- Results: Cost savings, reduced wait times, and better staff deployment

Why SensThys?

- Compact form-factor.
- High-performance RFID interrogation behavior.
- Equipment unobtrusively blends in hospital environment.
- Simplified and low-cost set-up due to:
 - Integrated Ethernet PoE routing.
 - Enables simple cascading of multiple readers.
 - Non-invasive set-up.
- Low attack surface architecture for customer data protection.
- Local European sales support provided by Cisper.
