

# E3™

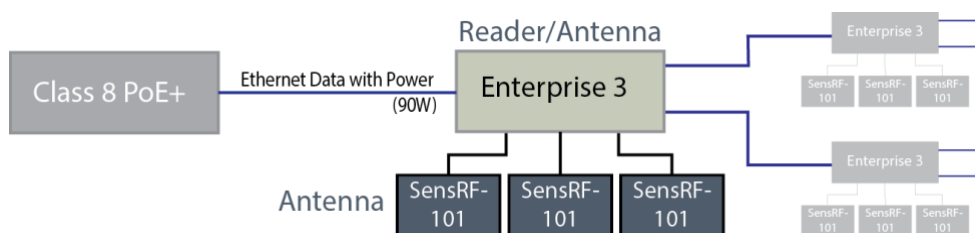

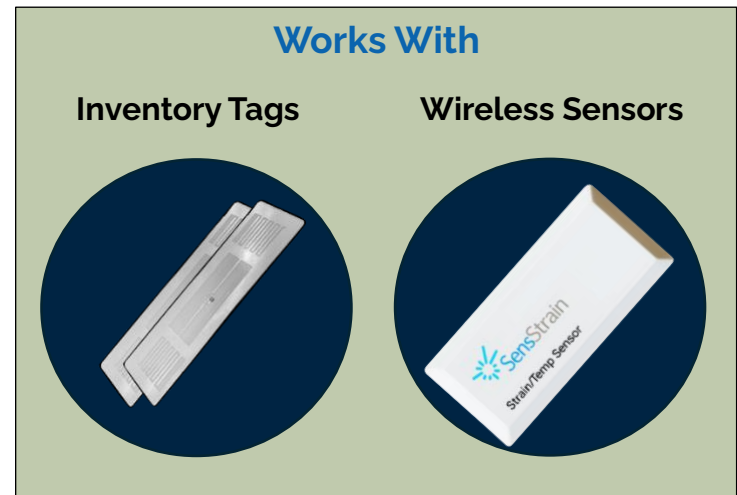

An EPIC Native Reader

The **E3** is an RAIN RFID **integrated reader** used for inventory tracking and sensing applications. The reader can be used by itself in smaller applications or connected to multiple external antennas and other readers. The E3's ability to power other devices from a single Power over Ethernet (PoE) cable allows it to massively reduce infrastructure and installation costs.

## Why Choose E3?

- **Data-Integrity:** E3 automatically fixes data errors.
- **Versatile & Powerful:** Reads sensor tags to monitor things like temperature, moisture, strain, composite curing, and others.
- **Fewer Cables:** Pass power and data between readers.
- **Stylish:** Sleek finish blends seamlessly into any environment.
- **Secure:** Keep hackers out and data secure.
- **Powered GPIO:** Easy to control accessories.
- **Economic:** Reduce up to 50% of all installation costs.

## Where Can You Use E3?

- **Warehouses:** Track inventory or protection tags with no hassle.
- **Manufacturing:** Monitor materials and sensors as products move through your process.
- **Offices or Labs:** Keep equipment and valuable assets tracked and secure.
- **Events & Check-Ins:** Quick, reliable ID or access checks without fuss.
